

Are your single vision patients complaining of eyestrain? We have the Remedy.

Introducing
Remedy Anti-Fatigue, a fully personalized, free-form digital lens designed with the latest technology to effectively combat symptoms of eyestrain.

Remedy Anti-Fatigue

THE PROBLEM

We spend an average 11 hours a day in front of screens, switching gaze continuously between monitors, smartphones, laptops, e-readers, and other digital devices. All this takes a toll on our eyes, leading to eyestrain symptoms such as **headaches, blurred vision, dry eyes, and neck and shoulder pain.**

THE SOLUTION

Remedy Anti-fatigue lenses target the causes of eyestrain, to deliver comfortable, natural vision.

Concentrated power boost in the near zone of the lens for **more relaxed close-up vision with less accommodative effort**, without compromising distance vision

Personalization using IOT Digital Ray-Path 2 technology for **an optimal vision zone up to 8x larger than a standard single vision lens**

Improved visual acuity on digital devices, designed for **faster reading speed and smooth transitions** between different viewing distances

3 OPTIONS AVAILABLE:

0.50 D

For those with **mild symptoms** of visual fatigue

0.75 D

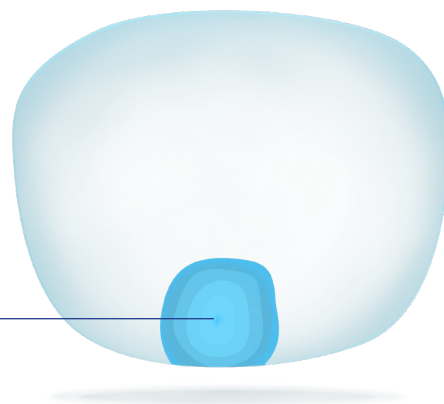

For people with **moderate symptoms** of visual fatigue

1.00 D

For pre-presbyopes and those with **severe symptoms** of visual fatigue

Excellent distance and peripheral vision

Concentrated power boost

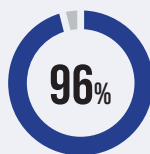

Unlike other anti-fatigue lenses, **Remedy Anti-fatigue lenses** offer the same crisp distance and peripheral vision as a single vision lens.

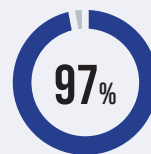

100% of wearers with digital eyestrain are comfortable in Remedy Anti-fatigue lenses

100% of wearers report excellent vision on first use

96% of wearers are satisfied while using digital devices

97% of wearers report excellent visual quality at distance, intermediate, and near

Results from a randomized double-blind wearer trial conducted by IOT.
